## SUNNY BOY STORAGE 3.7 / 5.0 / 6.0

## Reliable Supply

- Integrated secure power supply function
- Fully automated battery-backup function
- 10-year warranty

## Flexible Design

- Can be extended at any time by connecting up to three batteries
- Various PV system sizes and choice of batteries
- Ideal for both retrofitting and new installations

## Simple Handling

- Easy installation
- Quick commissioning with WebUI via WLAN using a smartphone or tablet
- Direct integration into Sunny Portal / Sunny Places via the Webconnect function

## SUNNY BOY STORAGE 3.7 / 5.0 / 6.0

## The first multistring battery inverter-always reliably supplied

With the SUNNY BOY STORAGE multistring battery inverter, for the first time, up to three different high-voltage batteries can be connected to one battery inverter. To connect larger batteries, three DC inputs can also be connected in parallel. The Sunny Boy Storage has integrated emergency power, which can be switched manually. Furthermore, it can even take over the entire electricity supply of the three line conductors via the optional automatic transfer unit. Thanks to proven AC coupling, the Sunny Boy Storage is ideally suited to new and retrofitted systems. The integrated webserver enables fast and easy commissioning, which is also possible via smartphone or laptop. Energy flows in the household are fully transparent thanks to the direct connection to Sunny Portal and Sunny Places.

## SUNNY BOY STORAGE 3.7 /5.0 / 6.0

## A RELIABLE SUPPLY AT ALL TIMES

THE FIRST MULTISTRING BATTERY INVERTER

Systems with the Sunny Boy Storage can be flexibly adapted to individual needs at all time. Whether the family situation changes, perhaps with the purchase of an electric car, which needs charging daily, or with a swimming pool in the garden for pleasure-with the Sunny Boy Storage, storage systems and PV systems can always be designed or expanded to suit specific requirements. The multistring battery inverter is unique, particularly when choosing and connecting different batteries. For a guaranteed electricity supply at any time, the Sunny Boy Storage offers twice as much security.

## NEW INSTALLATION OR RETROFIT: PV SYSTEM WITH BATTERY STORAGE

A PV system with a storage system makes the user independent from conventional power generators and rising electricity costs. With the Sunny Boy Storage, this is particularly easy and quick. Whether a new set-up or an existing system, the Sunny Boy Storage can be retrofitted in any existing PV system.

## SAFE: SUPPLY GUARANTEED EVEN DURING POWER OUTAGES

PV system operators always have a reliable supply during power outages. In the event of grid failure, the inverter can be manually switched to the emergency power supply with the integrated Secure Power Supply function. Secure Power Supply supplies a line conductor with nominal device power of up to 3.7 kW from the battery. The optional transfer switch can even take over the household's entire electricity supply of all three line conductors, fully automatically, in the event of grid failure. This means that you will have a reliable energy supply any time of the day and night.

## EXPAND: ADAPT AN EXISTING BATTERY STORAGE SYSTEM TO INCREASING DEMAND

For the first time, the multistring battery inverter offers the option to connect up to three high-voltage batteries made by different manufacturers. The system can therefore be expanded in the future due to rising energy demand without any problems. To connect larger batteries, three separate battery inputs can also be connected in parallel.

## Technical data (preliminary)

## AC connection

Rated power (at $230 \mathrm{~V}, 50 \mathrm{~Hz}$ )
Overload capacity (at $25^{\circ} \mathrm{C}$ to max. 60 sec$)^{21}$
AC nominal current output (at $230 \mathrm{~V}, 50 \mathrm{~Hz}$ )
Nominal AC voltage / AC voltage range
$A C$ grid frequency / range
Adjustable displacement power factor
Feed-in phases / connection phases

## Battery DC input

Max. DC voltage
DC voltage range / $D C$ rated voltage
Min. DC voltage / start DC voltage
Max. DC current per DC input / number of $D C$ inputs
Max. short-circuit current
Battery types

## Efficiency

Max. efficiency

## Protective devices

DC reverse polarity protection / AC short-circuit current capability
Ground fault monitoring / grid monitoring
All-pole-sensitive residual-current monitoring unit
Protection class / surge category

## General data

Dimensions (W/H/D)
Dimensions incl. packaging (W / H / D)
Weight / weight incl. packaging
Operating temperature range in battery operation
Max. installation height above MSL
Noise emission, typical (at 1 m distance)
Self-consumption standby / self-consumption with no load
Topology
Cooling method
Ingress protection
Climatic category
Max. permissible value for relative humidity

## Features / function

Secure Power Supply emergency electricity supply function
Interfaces
Communication / protocols
Battery communication
Display / Web User Interface
Remote monitoring

## Warranty

Certificates, approvals and manufacturer declarations

## Accessories

Automatic transfer switch for battery backup system
Sunny Home Manager / Home Manager 2.0
SMA Energy Meter

- Standard features O Optional - Not available

All information is preliminary-last update: December 2017

1) VDE: AR-N 4105 ; PAC, 4600 W ; Smax 4600 VA
2) only in battery-backup operation with an automatic transfer switch; overload capacity depends on the battery used
depends on the battery used
4 |Battery types approved by SMA, e.g., LG Chem, BYD, etc. (see www.SMA.Solar.com)

EXPANDED SYSTEM

## BASIC SYSTEM functions

- Energy management at grid-connection point
- Maximum system yield thanks to dynamic limit of feed-in to the utility grid between 0\% and 100\%
- Maximum transparency thanks to visualization in Sunny Portal / Sunny Places
- External Modbus interface
- Optional: fully automated battery-backup function for a complete household grid

## Expanded SYSTEM FUNCTIONS

- Basic system functions
- Reduction in energy costs thanks to usage of time-based electricity tariffs
- Maximum energy use thanks to forecast-based charging
- Increased self-consumption thanks to intelligent load control
